

JUDE NWAOLISA

Frontend Developer

Dedicated and results-driven Frontend Developer with hands-on experience in building dynamic, responsive, and high-performance web applications using modern JavaScript frameworks and tools. I have a proven track record in delivering scalable UI solutions and optimizing website performance. My expertise includes React.js, TypeScript, and Tailwind CSS, and I work closely with backend teams to integrate APIs and endpoints efficiently. I'm looking to contribute my technical skills and attention to detail to a team that values well-structured, functional, and visually consistent digital products.

- Strong communication and collaboration skills with the ability to work effectively with cross-functional teams, designers, and backend developers to deliver seamless digital experiences.
- Self-motivated and detail-oriented, capable of managing multiple projects in Agile and fast-paced environments while maintaining code quality and design consistency.
- Proven proficiency in frontend frameworks, API integration, UI/UX design systems, and performance optimization techniques.
- Skilled in a variety of frontend tools and technologies, including React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, Postman, Git/GitHub.

ACCOMPLISHMENTS

- Reduced page load times by 30% through React component optimization and code-splitting techniques, resulting in faster rendering, smoother navigation, and improved user retention and engagement.
- Built a fully functional e-commerce platform featuring dynamic product categories, persistent carts, and real-time order updates — enhancing user satisfaction, scalability, and checkout efficiency.
- Developed a School Management System focused on organizing and managing student, staff, and academic data, including result management and administrative workflows.
- Built a Rating System for healthcare professionals, enabling users to provide feedback and ratings to improve service transparency and performance evaluation.
- Improved development efficiency by 20% through reusable component architecture, cleaner state management, and better team code practices.
- Delivered pixel-perfect, responsive UI designs across over 10 client projects, ensuring full cross-browser and

mobile compatibility.

- Implemented secure authentication systems (Google and Email/Password) to improve platform security and streamline onboarding.
-

CERTIFICATIONS

JavaScript Version ES6 (Certificate of Completion)

Completed via Alison— September 2025

React JavaScript - Fundamentals to Coding & New Beginnings (Certificate of Completion)

Completed via Alison— September 2025

EDUCATION

Bachelor of Science – Computer Science (Second Class Upper)

Madonna University, Elele, Port Harcourt

WORK EXPERIENCE

Frontend Developer

4Core Integrated Service - Jabi, Abuja.

2024– present

- Designed and developed responsive, interactive web applications using React, Typescript, and Tailwind CSS.
- Integrated backend APIs for secure user authentication, data management, and real-time synchronization between client and server.
- Collaborated closely with designers, project managers, and backend engineers to implement functional, accessible, and visually appealing interfaces.
- Optimized site performance through lazy loading, caching, and code-splitting, reducing load time and improving SEO.
- Implemented state management with Redux Toolkit query, streamlining data flow and improving application performance.

- Debugged, tested, and deployed production-ready features with Git-based version control and Agile workflows.

Key Achievements:

- Improved web app responsiveness and load performance by 30%.
 - Managed application data flow using Redux Toolkit slices for structured and predictable state management.
-

Freelance Frontend Developer

2022– 2024

- Designed, built, and deployed modern web applications and e-commerce platforms using React, TypeScript, and Tailwind CSS.
- Developed custom dashboards with analytics, charts, and user tracking to support business intelligence insights.
- Integrated Firebase and Cloudinary for real-time database operations, authentication, and media storage.
- Created dark/light mode UI themes and animated transitions using Framer Motion, improving visual engagement.
- Implemented product search, filtering, and sorting features to enhance user experience and product discovery.
- Ensured full mobile responsiveness and browser compatibility through thorough testing and optimization.
- Collaborated with clients through Agile sprints, maintaining consistent communication, documentation, and feedback loops.

Key Achievements:

- Built an end-to-end e-commerce application featuring persistent cart functionality and order management.
 - Achieved high client satisfaction rates by delivering visually engaging, responsive designs that aligned with business goals.
 - Developed reusable React component libraries to speed up development for future projects.
-

RAD 5 Tech Hub – Aba, Abia State

2021 – 2022

- Designed and developed responsive, interactive web applications using React, JavaScript, and CSS.
- Integrated Firebase Authentication and Firestore Database for secure user management and real-time data syncing.

- Collaborated closely with designers and backend engineers to implement functional, accessible, and visually appealing interfaces.
- Optimized site performance through lazy loading, caching, and code-splitting, reducing load time and improving SEO.
- Implemented state management with Context API, streamlining data flow and improving application performance.
- Debugged, tested, and deployed production-ready features with Git-based version control and Agile workflows.

Key Achievements:

- Improved web app responsiveness and load performance by 30%.
