PROFESSIONAL SUMMARY

Frontend Engineer with professional experience building responsive and scalable web applications for enterprise, government, fintech, and education products. Strong in React, TypeScript, Next.js, Tailwind CSS, Redux Toolkit and REST API integration, with practical experience across complex workflows, dashboards, authentication, payments, and data-driven interfaces. Comfortable taking ownership from understanding product requirements through frontend architecture, implementation, API integration, debugging, testing, and delivery. Actively leverages AI as a development multiplier to accelerate workflows, sharpen decision-making, and raise product quality, while applying strong engineering judgment to keep outcomes robust and production-ready. Also serves as Lead Frontend Developer on Qalox, an entrepreneurial school management product built with a team.

CORE COMPETENCIES

- Frontend Development: React, TypeScript, JavaScript, Next.js, Tailwind CSS, responsive UI, reusable components
- State & Data: Redux Toolkit, RTK Query, Context API, REST API integration, structured data flows
- Product Development: Frontend architecture, authentication, dashboards, forms, multi-step workflows, API integration
- Quality & Delivery: Git/GitHub, code reviews, debugging, testing, Agile collaboration, performance optimization
- Additional Tools: Firebase, Cloudinary, Postman, Framer Motion

PROFESSIONAL EXPERIENCE

Frontend Engineer *4Core Integrated Services | Jabi, Abuja | 2024 – Present*

- Develop and maintain frontend features for enterprise and government platforms including VREG, IDEC, CBTAS, HRIS, and Change for Humanity.
- Build reusable React and TypeScript components and structure frontend features for maintainability and consistent user experiences.
- Integrate REST APIs for authentication, data management, application workflows, payments, and backend services.
- Implement application state and server data management with Redux Toolkit and RTK Query.
- Build responsive interfaces and complex workflows including forms, dashboards, document handling, and status-driven processes.
- Collaborate with backend engineers, designers, business analysts, and project stakeholders to translate requirements into working product features.
- Participate in code reviews, debugging, Git workflows, Agile delivery, and production support.

Stack: React, TypeScript, Next.js, Tailwind CSS, Redux Toolkit, RTK Query, REST APIs, Git/GitHub

Lead Frontend Developer / Entrepreneurial Product Team *Qalox – School Management System | Remote / Nigeria | 2026 – Present*

- Lead frontend development for Qalox, a school management platform built with a product team to support school administration and academic workflows.
- Own frontend implementation across the public product website and school portal experience.
- Design and implement reusable components and structured frontend features for dashboards, records, academic workflows, and administrative operations.
- Work with the team to translate product requirements into maintainable frontend solutions and coordinate frontend delivery with backend services.
- Contribute to product decisions, UI consistency, responsive behavior, and the overall quality of the user experience.

Stack: Vue 3, TypeScript, Vite, Tailwind CSS

Freelance Frontend Developer *Freelance | Nigeria | 2022 – 2024*

- Designed, built, and deployed responsive web applications and e-commerce products using React, TypeScript, and Tailwind CSS.
- Developed dashboards with analytics, charts, user tracking, search, filtering, and sorting features.
- Integrated Firebase and Cloudinary for authentication, real-time data, and media management.
- Built reusable component structures that improved consistency and reduced repeated frontend work across projects.
- Implemented responsive layouts, themes, animations, and cross-browser compatibility.
- Worked directly with clients through iterative delivery, feedback, documentation, and Agile-style workflows.

Stack: React, TypeScript, Tailwind CSS, Firebase, Cloudinary, Framer Motion

Frontend Developer *RAD 5 Tech Hub | Aba, Abia State | 2021 – 2022*

- Designed and developed responsive web applications using React, JavaScript, and CSS.
- Integrated Firebase Authentication and Firestore for user management and real-time data synchronization.
- Collaborated with designers and backend engineers to deliver accessible and functional interfaces.
- Applied lazy loading, caching, and code-splitting techniques to improve application performance.
- Implemented frontend state management with Context API and supported debugging, testing, and deployment.

Stack: React, JavaScript, CSS, Firebase, Firestore, Context API

SELECTED PROJECTS

VREG – National Vehicle Registration System *vreg.gov.ng*

Contributed to a national vehicle registration platform serving public users and government agencies. Built dynamic registration workflows, validation and document-upload experiences; integrated APIs for vehicle verification, payments and registration status; and contributed to role-based administrative dashboards.

IDEC – Import Duty Exemption Certificate System *idec.gov.ng*

Developed responsive interfaces for import duty exemption applications, including submission tracking, document review and approval workflows. Integrated backend services for application processing, verification and certificate generation, with authentication and role-based access.

CBTAS – Central Billing and Tax Administration System *cbtas.com*

Contributed to a centralized billing and tax administration platform for Kogi State and Niger State. Built data-driven dashboards and interfaces for billing, tax processing and payment-related workflows; integrated APIs for transaction management, invoice generation and financial reporting.

HRIS v2 – Human Resource Information System

Contributed to a comprehensive HR management platform developed by 4Core Integrated Services, covering employee records, workflows and organizational management, built on a domain-driven architecture.

Change for Humanity – NGO Digital Platform *changeforhumanity.org*

Developed responsive interfaces for donor engagement, volunteer registration and donation workflows. Integrated backend services and reusable UI structures while improving mobile responsiveness and consistency.

Qalox – School Management System *qalox.net*

Lead Frontend Developer on an entrepreneurial product built with a team. Qalox provides a school management platform and portal experience for school operations and academic workflows. Responsible for frontend architecture, reusable UI, responsive product experiences and coordination of frontend implementation with the wider team.

EDUCATION

Bachelor of Science (B.Sc.) – Computer Science | Madonna University, Elele, Port Harcourt

Second Class Upper

CERTIFICATIONS

- JavaScript Version ES6 – Certificate of Completion, Alison, September 2025
- React JavaScript – Fundamentals to Coding & New Beginnings – Certificate of Completion, Alison, September 2025
